EXPERIENCE

- **Ingram Micro** Chennai
Senior Software Developer *Jun 2023 - Present*
 - **Integrations:** Designed and delivered an end-to-end work-order integration suite spanning 10 major API integrations across ITAD and Depot workflows, covering create/update flows, status services, third-party integrations, master-data validation and configuration-driven rollout.
 - **Tech Lead:** Serve as Technical Lead for a team of 3 engineers, driving architecture decisions, code reviews and engineering standards across a 12-repository, multi-tenant platform.
 - **Platform Engineering:** Built multi-tenant interoperability capabilities across the platform, including tenant-specific invoicing workflows and a unified carrier-tracking integration consolidating UPS, FedEx and DHL into a common workflow.
- **UST GLOBAL** Remote
Research Intern *Jun 2022 - July 2022*
 - **Automatic License Plate Recognition:** Built an automatic license-plate recognition pipeline from drone footage using YOLOv5, PaddleOCR and DeepSORT (90% accuracy), deployed end-to-end via Streamlit/ngrok.
- **UST GLOBAL** Remote
Research Intern *Jun 2021 - July 2021*
 - **Pose Detection:** Developed and optimized a neural network for real-time detection of 85+ yoga poses (75%+ accuracy), after surveying pose-estimation models (OpenPose, PoseNet, MoveNet).

EDUCATION

- **Indian Institute of Technology (IIT), Palakkad** Kerala, India
Bachelor of Technology with Honours - Computer Science and Engineering; CGPA: 9.43 *May 2023*
- **St Thomas Residential School** Kerala, India
Class XII (ISC); Percentage: 99.0% *April 2019*

SKILLS SUMMARY

- **Languages:** C#, Python, TypeScript, JavaScript, Java, C++, GDScript
- **Frameworks:** .NET Core, Entity Framework, Azure Functions, Angular, React, React Native, Node.js, PyTorch
- **Tools:** Git, SQL Server, PostgreSQL, MongoDB

PUBLICATIONS

- **Deployability of Deep Reinforcement Learning in Portfolio Management:** Studied risk-sensitive actor-critic and Transformer-based PPO agents for portfolio management, benchmarking deep RL policies against Sharpe-optimal baselines in a simulated market. Published at the 8th ACM CODS-COMAD (Dec 2024). [Paper]

PROJECTS

- **EdenAlpha:** Algorithmic Trading Platform: Built a full-stack workspace for Indian equities (NSE/BSE) spanning strategy authoring, historical backtesting, paper trading and live-execution architecture. Published a companion Python SDK to PyPI (edenalpha) with idempotent, retry-safe order APIs to prevent duplicate order submission on network timeouts. Designed as the deployment target for RL-based trading strategies. (April 2026 - Present) [Live]
- **NeurIPS 2025 MindGames Challenge:** Qualified for Stage 2 (Top 5 Finish) by building a hybrid RL + LLM social-deduction agent ("DeceptionNet") using imitation learning and PPO fine-tuning. (Nov 2025) [Code]
- **Android Malware Detection:** Research project under Dr. Vivek Chaturvedi exploring low-compute Android malware detection using Graph Neural Networks and Explainable AI. (Jan 2022 - May 2022) [Code]
- **PlexShare App:** Under Ramaswamy Krishnan-Chittur, Microsoft. Developed the whiteboard module of a lab-session monitoring application, leading a team of 6 and using MVVM architecture and design patterns in C#. (Aug 2022 - Dec 2022) [Code]

ACHIEVEMENTS & LEADERSHIP

- State Third Rank Holder of 12th ISC Boards - April 2019
- Lead at YACC (Coding Club) - Apr 2021 — May 2023
